IT'S 7:00 A.M.
DO YOU KNOW WHAT YOUR LIFT TRUCKS ARE DOING?

iW

FLEET AND WAREHOUSE OPTIMIZATION SYSTEM

iWAREHOUSE®
by Raymond

WELCOME TO A DAY IN THE LIFE OF
A LIFT TRUCK.

It begins early.
As operators badge in for the day and start going through their daily checklists.

It continues.
As the day's work proceeds, the truck becomes more than a vehicle. It becomes an information-gathering device. Collecting real data. In real time. Recording it. Storing it. Sharing it.

Data needed to meet OSHA compliance requirements. Data that reflects operational parameters. And that tells the warehouse manager who's doing what and what's going on.

And it doesn't end there.
As data is collected, it is sent on to other managers. In HR, Finance and the C-suite. Providing them with an enterprise-wide view of the truck, how it fits into the total picture, and impacts productivity and profitability. Giving them all the capability to turn data into knowledge. And knowledge into action.

This is not just the day in the life of a lift truck. It's a day in the life of a smart warehouse.

Run Better. Manage Smarter.

FROM THE WAREHOUSE FLOOR…

iWAREHOUSE ESSENTIAL™

VERIFY
Operator identification and OSHA compliance.

BATTERY
Real-time battery monitoring.

IMPACT
Monitor truck impacts with automatic notification.

TRACK
Fleet maintenance tracking.

GATEWAY
Warehouse information integrated into one web portal.

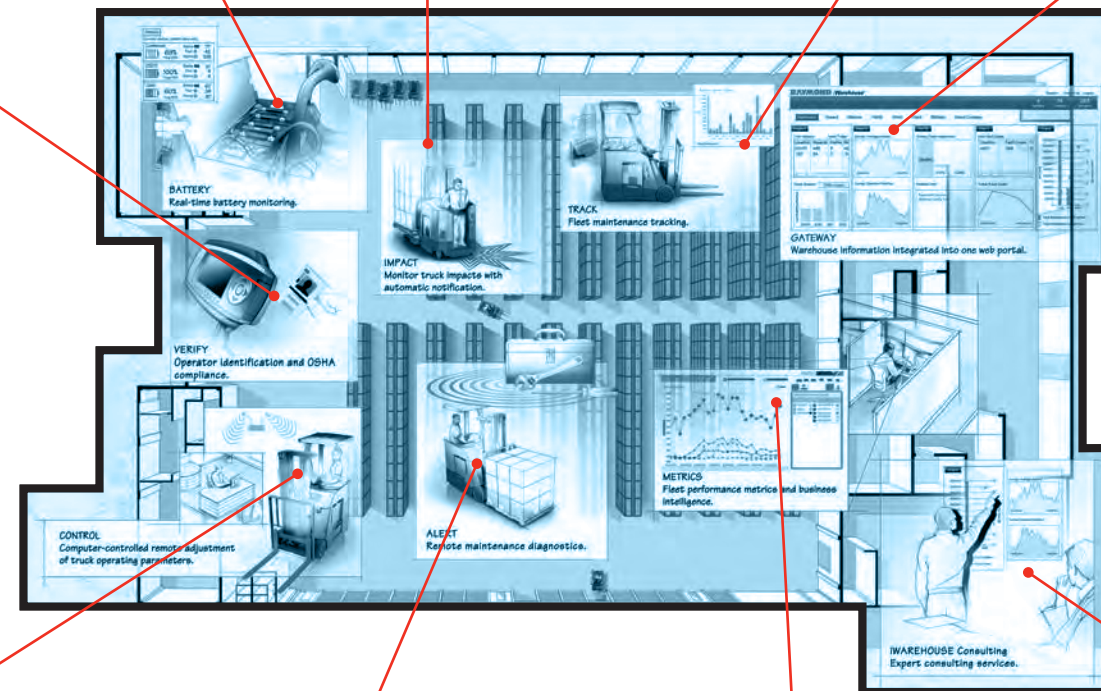

» Access Control & Compliance

With iWAREHOUSE, before operators drive a truck, they must log into the truck and complete an electronic inspection checklist at the start of their shift. The system also records and stores inspection data with date/time stamps and operator names, ensuring compliance with OSHA requirements.

» Impact Management

Immediate impact notification via email or text message identifying which truck and operator have been involved in an incident. The system can even be programmed to limit the truck's travel speed after an event. The result is greater operator accountability, lower costs related to truck repairs and damaged inventory and racking, and a more productive operating environment.

» Control & Metrics

iWAREHOUSE puts warehouse managers in the driver's seat by allowing them to remotely adjust truck operator parameters, monitor status of batteries, and track total fleet performance.
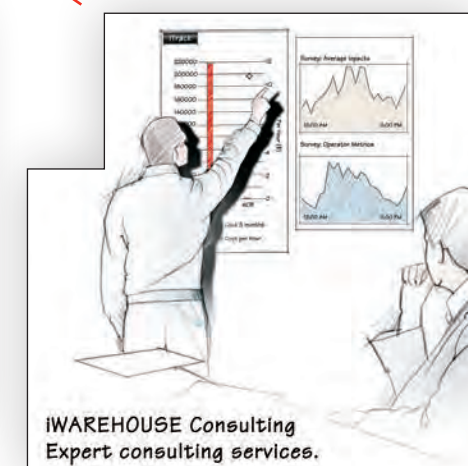

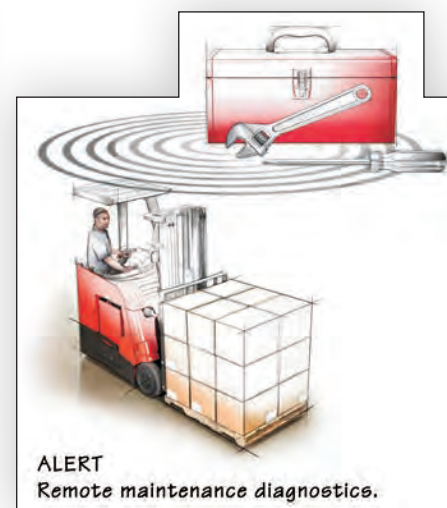

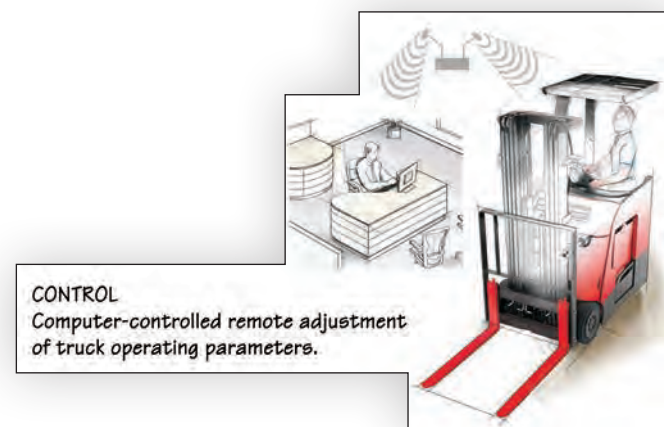

» Fleet Optimization

iWAREHOUSE is a comprehensive fleet optimization system that utilizes a unique single web portal through which managers can view and analyze the real-time metrics of their material handling equipment and operators.

» Warehouse Optimization

iWAREHOUSE provides operational visibility, from an individual truck to a complete fleet, and from one warehouse to multiple locations. It helps managers develop actionable business solutions that increase asset utilization, drives out inefficiencies and optimizes operations. In addition, it integrates with select labor management systems to increase productivity and reduce operating costs.

» Tailored Consulting Services

To help enterprises get the most out of their warehouses and fleet optimization systems, Raymond offers tailored consulting services by experts who stand ready to help managers use iWAREHOUSE to its fullest advantage, and make the smart warehouse a profitable reality.

CONTROL
Computer-controlled remote adjustment of truck operating parameters.

ALERT
Remote maintenance diagnostics.

METRICS
Fleet performance metrics and business intelligence.

iWAREHOUSE Consulting
Expert consulting services.
